This data is shared with the Board of Education at the beginning of the year, Parish Priest and our Parents and Parishioners once a year. The teachers are only made aware of the information that is pertinent to their role in education.

These enrollment figures are used for many purposes: budgeting (tuition income, expenses like textbooks, salaries, etc.), classroom numbers (in determining whether to hire a classroom aide), public school (in terms of IEPs and services through AEA 11), tuition assistance and our kitchen manager (in terms of properly reporting reimbursable meals).

One example of where this information was/is used is after registration day, we evaluate the need for an aide in the early childhood classroom. With our school adhering to IQPPS Standards we have needed to hire an aide these three school years to stay within the appropriate ratio of students to adults. In years prior to this chart we did not have an aide in the EC classroom, mostly because our enrollment has increased in these classrooms.
